

***We Deliver a Better Experience,  
All the Way Around.***

**KAL Manufacturing**  
*Process-Driven for Success*

# ***Gain the Edge With KAL Manufacturing.***

In today's competitive marketplace, you need a contract manufacturer with the agility to identify and eliminate the roadblocks standing between the part, product or assembly design and its final destination. Choosing KAL Manufacturing gives you access to complementary processes, capabilities, and experience that will help you create the best route to success.

Built on industry best practices and subject to continuous improvement, our responsive, accurate, and efficient working process delivers:

- Reduced lead times for cold-start programs, quotes, and jobs
- Increased manufacturability for added value and cost-effectiveness
- Prototype through production capabilities
- Clean and efficient manufacturing processes
- Built-in quality that's unsurpassed

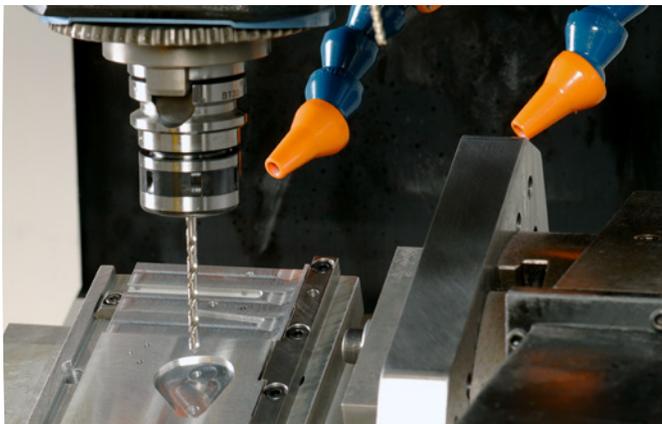

## ***Experienced Partner***

KAL Manufacturing is a proactive contract manufacturer of high complexity metal products and assemblies for international OEMs. This experience makes us sensitive to the unique manufacturing and quality requirements of a host of industries, from medical to military, telecommunications to transportation, industrial to office, and diagnostics to printing.

Our agility, size, and technology allow us to collaborate with customers at whatever stage they require our expertise. Our extensive capabilities and resources give us the flexibility to handle any part, product, or assembly.

## ***ISO Certified and ITAR Registered***

Our commitment to industry best practices and continuous improvement ensure that KAL Manufacturing has the internal systems and processes needed to provide efficient and cost effective manufacturing solutions that are quality compliant and delivered on time.

---

## **Process-Driven Solutions, by Design**

KAL Manufacturing has the experience, capabilities, and technology required to meet the array of needs that your program demands. As your partner, we will access our collective experience, configure our capabilities, and apply our quality standards to create advantages that benefit your program and bottom line.

### **Early Supplier Involvement (ESI)**

It is easier and less costly to innovate and clean designs upfront rather than after production has begun. We offer ESI in the alpha, beta, and prototype builds with the goal of advancing your program to the next level of quality and ensuring on-time delivery of your program, every time.

### **Program Management**

Your program deserves special attention. Our program managers deliver it. You can count on them to get your program to market on time by ensuring that we successfully meet your needs, requirements, and expectations along the way.

### **Engineering**

The length of a program varies. We enlist our engineering ingenuity and experience throughout the life of your program to meet and exceed your requirements while maintaining the highest process capability at the lowest possible cost.

### **Manufacturing**

Building a successful program requires resources. We combine efficient manufacturing techniques with our extensive manufacturing experience to develop the best methods to produce finished parts with speed, accuracy, and consistency.

### **Quality Assurance**

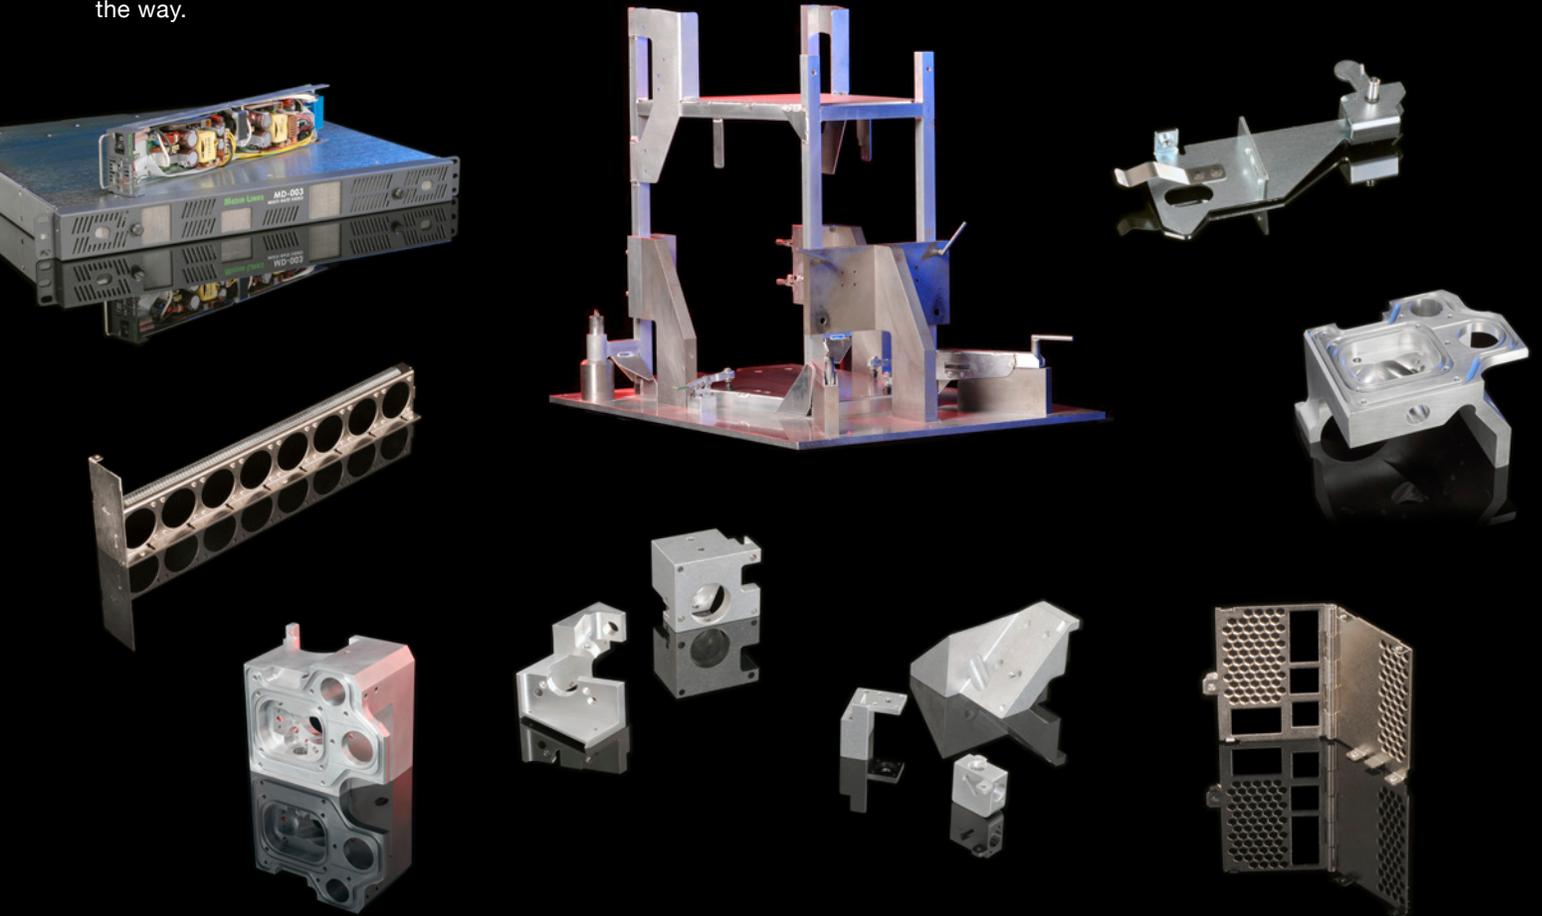

We integrate quality control measures into every aspect of your program so that you receive only quality parts, products, and assemblies.

### **Contract Assembly**

One reliable partner can do it all. We provide electro-mechanical contract assembly solutions that include turnkey box build, sub-assembly build, and parts kitting options.

### **Supply Chain Management**

Trust is key. We have an established, proven supply chain that can provide everything you need for your program requirements on time.

# **Process-Driven Solutions for OEMs Since 1943**
